RE: Nephi Gypsum Quarry, M/023/011

On January 14, 1988, Bob Steele met with Dave Wham, Lowell Braxton, and I at the Division's offices. We assisted Mr. Steele in preparing a mine and reclamation plan which was acceptable to both him and the Division.

Mr. Steele objected to hauling in soil during reclamation. He believes that the gypsum remaining in the fine stockpile will adequately serve as a substitute soil material. He pointed to the volunteer rabbit brush growing on the stockpile now as evidence. We concurred with Mr. Steele's suggestion provided that the pad stockpile area meets revegetation standards after reclamation.

It was also determined that Bob Steele and/or Tony Peck will have to post a reclamation bond of \$15,000 for the quarry. If the bond is received prior to the January Board meeting, the order to show cause will be cancelled.
